

STRENGTHENED HSEQ AT PETERSON WITH PRO-SAPIEN

Established in the offshore logistics sector over 40 years ago, Peterson has expanded from the UK and Netherlands and now has facilities at a number of prominent ports across the world.

Offering three core activities, namely quality assurance, integrated logistics and related activities, Peterson operates across various industries spanning agriculture to coal and minerals, and oil and gas to biofuels and biomass.

Peterson is dedicated to health and safety, environment and quality. It is embedded in their philosophy and is an integral part of their business management. As part of a high-risk sector and with thousands of employees worldwide, Peterson is the type of organization that requires a fail-safe, modern and easy-to-use EHS and

Quality solution. Significant investment in their new management system from Pro-Sapien is assisting Peterson in their mission to deliver industry-leading standards, by improving incident and occurrence processes and utilizing business intelligence services for key metrics reporting.

“Trust and safety are core values for Peterson so it is of paramount importance that we work with software providers that can give us solutions that continually help us to improve the quality service our clients have come to know us for.

Pro-Sapien’s solution also has the flexibility to incorporate additional business processes and reporting as we move forward. Peterson has made a strategic investment in the SharePoint platform and our new application maximises the benefits of that.”

Murdo MacIver
Board Director

“ We reviewed a number of systems and one of the major factors in our decision making process was the management information and reporting that Pro-Sapien provides. In a nutshell, any information we capture in the electronic forms we can report on; be it via KPI's, reports and/or graphs using a number of different technologies accessible through our SharePoint portal.”

Keith Dawson
Head of HSEQ

By investing in Pro-Sapien's flagship product *HSEQ Innovate*, Peterson is seeing major productivity, process and management benefits. Implementing a system where all follow up actions and tasks are monitored has enabled the Health and Safety team to schedule and prioritise more effectively.

Our EHS and Quality management solution is designed for enterprises requiring powerful reporting capabilities, which is why it is such a perfect fit for global organizations like Peterson already investing in the SharePoint platform.

Our flagship product *HSEQ Innovate* has been advocated by some of the world's largest companies and is deployed globally across each of our clients' hundreds of sites.

If you'd like more information about how our solution can make your EHS and Quality data more meaningful with powerful reporting capabilities, visit our website or even better, contact us today.
