

COMPREHENSIVE HSE REPORTING IS NO LONGER A PIPEDREAM

ShawCor is a growth-oriented, global energy services company specializing in technology-based products and services for the pipeline, petrochemical and industrial segments of the oil and gas industry, amongst other industrial markets.

ShawCor is committed globally to achieving HSE excellence, and is dedicated to continuous efforts to provide a safe and healthy workplace that protects people, property, and the environment. Part of their strategy is the implementation of Pro-Sapien's EHS and Quality management application. With thousands of employees located throughout the world, ShawCor required a solution with enterprise-class

capabilities. Not only that, the product also had to be able to make use of the company's recent investments in SharePoint. This is where Pro-Sapien's software fits in perfectly - working with the HSE and IT teams based in North America, we have implemented our application to meet the health and safety requirements of ShawCor across 10 business divisions in 22 countries.

“Pro-Sapien's product has proven to be an excellent choice.

It gives us the flexibility for future enhancement and on-boarding of additional processes such as audit tracking, which is also applicable to the wider business.”

*George Brandon
Group Health and Safety Manager*

“The Pro-Sapien team have been great to work with and have delivered a solution that can be extended to incorporate other processes and workflows as we need them.

We have replaced a Lotus Notes based application along with other software that no longer met our health and safety requirements. ShawCor now has a single application to meet our needs and in addition, has a comprehensive view of how the business is performing using a multitude of measures by division, region and process.”

Dan Lefebvre
Project Manager

Pro-Sapien implemented the SharePoint 2010 Enterprise version of flagship product *HSEQ Innovate* which delivers the following key functions for ShawCor:

- ✓ Electronic forms including:
 - Incident Report
 - Request for Action
 - Audit Tracking
 - Leading and Lagging Indicators
 - Custom Alerting
- ✓ Corrective Action List for action management including:
 - Action Approval
 - Email Notification
 - Action Verification
- ✓ Approval processes
- ✓ SQL Server Data Warehouse and Analysis Cube
- ✓ Dashboards and reports
- ✓ Slice and dice analysis of data via the dashboard
- ✓ Various reports including:
 - Recordable Analysis by Division
 - Audit Findings Tracking

Our ShawCor implementation is a good example of how Pro-Sapien can provide clients with a tailored, enterprise level solution that meets their specific requirements by extending the out of the box functionality.

If you'd like more information about how we can help you make your captured EHS data more meaningful across regions with a user-friendly solution, visit our website or get in contact today.
