

# EHS Analytics

## Users vs. Non-Users

The main benefit of analytics in EHS is to discover hidden areas for improvement in operations, which is why 50% more of the Best-in-Class utilize performance management tools. In fact, the use of analytics can be tied directly to increased improvement on the following key metrics.

25%

**Lower recordable injury frequency rate per 100 employees**

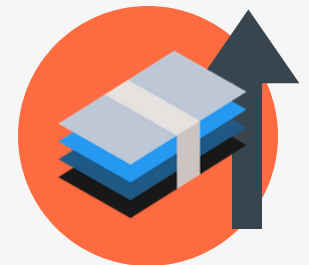

63%

**Lower near miss rate for personal safety per 100 employees**

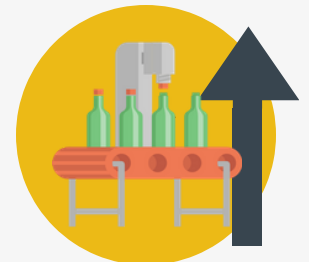

4x

**Higher operating margin vs. corporate plan**

3pts

**Higher Overall Equipment Effectiveness (OEE) Rate**

Capturing the data is only half the story...

**It's what you do with it that counts**
